INTERNSHIPS

Jul 2022 — Sep 2022	Web Development, ARIST AUTOMATION	Bhopal

I have done internship as a Web Developer trainee in Arist Automation where I have learned about the UI and it's development with the use of HTML, CSS, JavaScript, NodeJs in Visual Studio. In this training I had learned about creating a website and how we host them through servers, design of website with this I have learned about the how to connect the Back-End Web Development like mongo DB cluster. And I have also learned how to work on React.

LANGUAGES

English	Very good command	Hindi	Native speaker

PROJECTS

Social media cone

A project built on the React with the help of HTML, JavaScript, CSS, Node, MongoDB and we use postman for getting response of server and testing schema. It is a full-stack web development project.

In this online app, a user can create an account on the site then use it by signing up with their username and password. In this platform, a user can interact with people by sending them friend request and then start a conversation and make friends.

Food delivery management system (UI)

An online website having only the front hand with responsive nature. with the help HTML, JavaScript, Node and CSS3. In this site, we give the navigation bar menu of registered cafe and the hotels we want to order food from. It was project built for learning the concept of web development, there is no database connectivity in this project.
